SIMPLE LL97 COMPLIANCE

FIRST LL97 STEPS

Compliance for LL97 has started, how detailed is your plan to avoid paying penalties in the first penalty cycles?

You don't have time to handle your current tasks, how will you create more time to understand LL97?

Here is a simple plan to help guide your first few steps:

1. Collect all your electric and heating bills in one place.
2. Enter those bills into <https://www.be-exchange.org/calculator/> to determine when your penalties begin.
3. If you do not have an annual penalty in the first cycle, take some preliminary steps to start lowering energy consumption, to lower future penalties.
4. If you have an annual penalty under \$25,000, you may be able to comply with a few low-cost measures, we can help.
5. If you have an annual penalty over \$25,000. let us know and we can walk you through the next few steps, spending as little as possible.

Put your trust in **one of the oldest NYC energy engineering firms**, one who has guided hundreds of properties just like your property.
